Immune Tincture

Available in 48 & 96 Serving Liquid

Echinacea Angustifolia Root (*Echinacea angustifolia*) is well known for its use in helping the body to recover from acute infections. Echinacea is a wildflower native to North America and was used by some Native American tribes to treat venomous bites. It activates white blood cells and may increase interferon production, which is important in fighting viral infections. Echinacea is especially indicated for people who are fatigued and present with swollen lymph nodes. Recent research indicates that echinacea is most helpful at the onset of acute infections rather than for prevention of colds and flu.

Astragalus Root (*Astragalus membranaceus*) is native to China and used extensively in Traditional Chinese Medicine as a Qi (chi) tonic. Astragalus is thought to act as an immune tonic. This herb may increase bile flow to improve appetite and digestion hence it is especially indicated for people in a weakened state. Astragalus is also used to treat hepatitis and as an adjunctive therapy for people with cancer.

Pau d'Arco Bark (*Tabebuia impetiginosa*) is a Latin American herb with possible applications for both acute and chronic illnesses including infections and cancer. In vitro studies have shown it to be anti-bacterial, anti-viral, and anti-fungal. Indigenous people in Central and South America as well as Caribbean healers use pau d'arco for infectious diseases, wounds, and other health conditions.

Cat's Claw Bark (*Uncaria tomentosa*) is another South American herb with many traditional applications including rheumatism, intestinal complaints, and wound healing. In vitro studies suggest that cat's claw bark stimulates immune function. This herb has also been clinically proven to improve osteoarthritis and rheumatoid arthritis.

Maitake Mushroom (*Grifolia frondosa*), Reishi Mushroom (*Ganoderma lucidum*), and Shiitake Mushroom (*Lentinusedodes)* contain complex polysaccharides that enhance immune function. These mushrooms are traditionally classified as immune modulators. Reishi mushrooms have wide applications in addition to immune function including decreasing blood pressure and LDL cholesterol, and improving the health of people with hepatitis B, cancer, and diabetes. In addition to its benefits in improving survival in some people with cancer, shiitake has also been shown to reduce the recurrence of genital warts.

Eleuthero Root (*Eleutherococcus senticosus*) is also known as Siberian ginseng. Eleuthero has a long history in Asia of being used to prevent respiratory infections, cold, and flu. In Russia, Eleuthero has been used to enhance endurance of athletes, prevent stress-related illness, and to counteract the effects of radiation exposure from the accident at Chernobyl.

Schisandra Berries (*Schisandra chinensis*) is an herb native to China, Russia and Korea. Herbalists have used it as an adaptogen, helping the body respond to stress. Recent research suggests that some of the lignans present in schisandra have an immune-modulating effect.

Teasel Root (*Dipsacus fullonum*) was introduced to the colonists by Native American Indians. Teasel Root is used to break fevers. Animal studies with this root have shown anti-inflammatory effects and activity against *Plasmodium falciparum*, the parasite that causes malaria.

SUPPLEMENT FACTS

Serving Size: 1 Full Dropper

Servings Per Container: 48 or 96

Echinacea Angustifolia Root (<i>Echinacea angustifolia</i>)	15%
Astragalus Root (<i>Astragalus membranaceus</i>)	15%
Pau d'Arco Bark (<i>Tabebuia impetiginosa</i>)	10%
Cat's Claw Bark (<i>Uncaria tomentosa</i>)	10%
Maitake Mushroom (<i>Grifolia frondosa</i>)	10%
Teasel Root (<i>Dipsacus fullonum</i>)	10%
Reishi Mushroom (<i>Ganoderma lucidum</i>)	10%
Shiitake Mushroom (<i>Lentinus edodes</i>)	10%
Eleuthero Root (<i>Eleutherococcus senticosus</i>)	5%
Schisandra Berries (<i>Schisandra chinensis</i>)	5%

Suggested Use: 1-2 droppers, 1-2 times daily, add to water or juice.

Warning: If you are pregnant, nursing, or are taking any medications, please consult your health care practitioner before taking this or any herbal product.
