# ImmunoMax

Available in 60 or 180 count Vegetarian Capsules and 60 count Chewables

## ImmunoMax Chewables

**ImmunoMax Chewables** features herbs and nutrients targeted at supporting immune function during acute illness.\* ImmunoMax contains **DMG (dimethylglycine HCl)** which, according to research, may help stimulate the immune response by enhancing antibody and lymphocyte production. Three U.S. Patents have been awarded based on research into DMG's role in immune response. This product also contains arabinogalactans which are compounds derived from the larch tree that help increase the number of immune cells, boost antibody response, and limit unhealthy cell replication. According to some research, incidence of upper respiratory infections may be reduced with use of larch arabinogalactans. Another ingredient, **Maitake PD-Fraction®**, has been extensively researched as a general immune support as well as specifically immune-stimulating against cancer cells. Maitake mushrooms contain complex polysaccharides that enhance immune function. **Beta-1, 3-Glucans** increase host immune defense by activating the complement system, enhancing macrophages and natural killer cell function, and inducing cellular immune responses. The Beta Glucans in ImmunoMax are derived from the cell wall of baker's yeast which is then purified to contain no yeast proteins, therefore it is free of allergenic material. **Astragalus membranaceus** features extensively in Traditional Chinese Medicine as a Qi (chi) tonic. Practitioners of herbal medicine also employ astragalus as an immune adaptogen. **Elderberry** also called *Sambucus nigra*, has been used by herbalists for pain, inflammation, coughs, laryngitis, and cold and flu symptoms. Both in vitro and animal studies show that elderberry is anti-viral and reduces excessive sinus mucus excretion, making this plant an important ally in promoting sinus and upper respiratory tract health.

Various vitamins are included in **ImmunoMax** to support the immune response. **Vitamin D (included in the chewables)** is an immune system modulator that promotes healthy T-Cell and macrophage responses. **Vitamin C (included in the chewables)** may help reduce the duration of the common cold, especially in children. It also regulates histamine production and metabolism. In studies, low vitamin C was associated with higher histamine production and administration of vitamin C reduced blood histamine levels. **Vitamin E (included in the chewables)** is present in higher concentration in immune cells compared to other blood cells. **Vitamin E** supplementation has been found to enhance immune function especially in elderly individuals. Beta carotene is the precursor to vitamin A which plays an important role in immune system function and helps mucous membranes (especially in the lungs) resist invasion by microorganisms. **Zinc (as Zinc Bisglycinate Chelate TRAACS™) (included in the chewables)**, an essential mineral, is found in almost every cell of the human body and stimulates the activity of approximately 100 enzymes. Zinc serves many functions in the body like immunity, gene expression, protein folding, enzyme function, and wound healing. Many research studies have shown that zinc induces improved immune response during infection, such as increasing CD4 T cells and T lymphocytes. Additionally zinc may reduce the duration and severity of cold symptoms.

**Olive Leaf Extract (included in the capsules)**, works directly against unwanted materials by stimulating your own protective cells (phagocytes) to ingest them without suppressing the immune system or damaging the body's beneficial flora.

**Selenium (Selenium glycinate (Albion™)(included in the chewables)** demonstrates many benefits in the human body as an essential trace element. In addition to supporting thyroid function and immune cell counts, it is a precursor to synthesis of the powerful antioxidant glutathione.

## SUPPLEMENT FACTS

### CAPSULES

Available Bottle Sizes: 60 or 180 Count

Serving Size: 2 Capsules

Servings Per Container: 30 or 90

Amount Per Serving

Larix laricina (as FiberAid® Arabinogalactan)	266 mg
Dimethylglycine (DMG) HCl	250 mg
Olive Leaf Extract	100 mg
Beta Glucan 1,3/1,6 (from <i>Saccharomyces Cerevisiae</i> ) Yeast	100 mg
Maitake (as PD-Fraction®) Fruiting Body Extract	20 mg

**Other Ingredients:** Hypromellose (Capsule), Rice Flour, Vegetable Stearate, Titanium Dioxide (Color).

**Suggested Use:** As a dietary supplement, take 2 capsules 1-2 times per day, or as directed by your healthcare practitioner.

**Warning:** If pregnant, nursing or have an auto-immune disorder or are taking immune suppressant or blood thinning medications, do not take this product without first consulting your healthcare practitioner.

**Caution:** Discontinue use 2 weeks prior to surgery.

### CHEWABLES

Available Bottle Size: 60

Serving Size: 1 Chewable Tablet

Servings Per Container: 60

Amount Per Serving

Vitamin A (as Beta Carotene)	600 mcg
Vitamin C (from Acerola Fruit Extract)	37 mg
Vitamin D (as Cholecalciferol)	25 mcg
Vitamin E (as D-Alpha Tocopheryl Succinate)	67 mg
Zinc (as Zinc Bisglycinate Chelate)(TRAACS™)	10 mg
Selenium (as Selenium Glycinate)(Albion™)	50 mcg
Larix Laricina (as Arabinogalactan)	125 mg
Dimethylglycine (DMG) HCl	100 mg
Beta Glucan 1,3/1,6 (from <i>Saccharomyces cerevisiae</i> )	100 mg
European Elder Fruit Extract	50 mg
Astragalus Root Powder	50 mg
Maitake (as PD-Fraction®) Fruiting Body Powder	10 mg

**Other ingredients:** Sorbitol, Stearic Acid, Magnesium Stearate, Microcrystalline Cellulose, Silicon Dioxide, Natural Flavors, Rebaudioside A (from Stevia Leaf Extract).

**Suggested Use: Adults (Age 18 and above):** As a dietary supplement, chew 1 tablet, 2-4 times daily or as directed by your healthcare practitioner.

**Teens (Ages 12-17):** Chew 1 tablet, twice daily. Not to exceed 2 tablets daily.

**Children (Ages 4-11):** Chew 1 tablet daily. Not to exceed 1 tablet daily.

**Warning:** If pregnant, nursing or have an auto-immune disorder or are taking immune suppressant or blood thinning medications, do not take this product without first consulting your healthcare practitioner.
