Inflam

Available in 90 or 180 Count Vegetarian Capsules

The ingredients in Inflam II can reduce the pain, swelling, & inflammation found in arthritis. This formula was designed to help increase mobility and may decrease the need for over-the-counter pain medication. Inflammation is associated with health conditions such as arthritis, heart disease, autoimmune disease, and inflammatory bowel disease. The inflammatory process refers to a chain of events that occur in the body in response to trauma or injury. Inflammation can be acute or chronic. It leads to changes in the cells, tissues, and blood vessels surrounding the inflamed area.

About the ingredients

Holy basil (*Osimum sanctum*) is a popular Ayurvedic herb. Holy basil is known as an adaptogen to increase the body's resistance to stress. Traditionally it has been used for cardiovascular disease and respiratory disorders. Research supports its use as an antioxidant and for treating asthma and high blood sugar.

CurcuWIN™ is a novel curcumin product that demonstrates improved bioavailability compared to other curcumin preparations. Serum levels of curcuminoids were **46% higher** with oral intake of CurcuWIN™ as compared to other curcumin supplements. Increased bioavailability is possible utilizing **UltraSOL™** technology, a molecular dispersion process that enhances the bioavailability of poorly absorbed nutrients and increases water-dispersibility of fat-soluble ingredients. Curcumin has potent anti-inflammatory actions. It inhibits the formation of the pro-inflammatory mediators thromboxane & prostaglandin. Turmeric does not interfere with beneficial prostaglandin production and therefore does not harm the stomach lining. This distinguishes it from pharmaceutical NSAIDs.

Ginger root (*Zingiber officinale*) is a tonic to the digestive system, as well as having analgesic and anti-inflammatory actions.

Green tea (*Camellia sinensis*) contains polyphenols and flavonoids (like EGCG) which reduce inflammation & oxidative stress. Since these play a role in the development of arthritis, green tea is used to manage joint destruction. Green tea also shows promise in preventing cancer, supporting weight loss, and lowering cholesterol.

Boswellia serrata is an Ayurvedic herb that targets inflammatory diseases like arthritis, asthma, & colitis. Boswellia does not cause the gastric side effects exhibited by pharmaceutical NSAIDs. Boswellia may help arthritis by improving blood supply to the joints and the prevention of connective tissue breakdown.

Bromelain is a proteolytic enzyme derived from pineapple. It is thought to reduce inflammation by inhibiting prostaglandin synthesis.

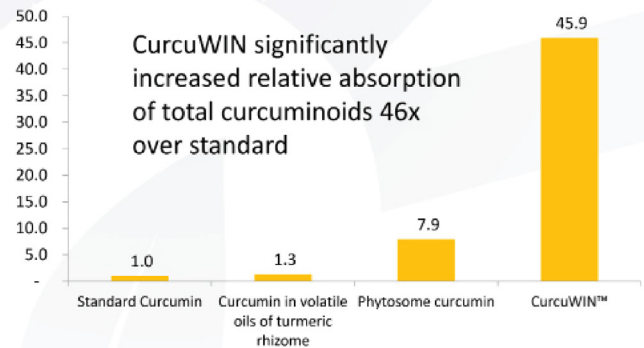

Baical skullcap (*Scutellaria baicalensis*) is grown in China and Russia. Preparations of this herb have been used extensively to reduce inflammation associated with osteoarthritis, without the negative side effects characteristic of prescribed medications.

Resveratrol is an antioxidant that naturally occurs in red wine. It may have a variety of therapeutic applications in inflammation, cancer, aging and diabetes.

Berberine is a plant-derived alkaloid used for a wide range of ailments including infections, arthritis, and other chronic inflammatory disorders.

Bioperine® (Black Pepper Fruit Extract) enhances the absorption of other nutrients, like curcumin by **30%** into the bloodstream, according to several studies.

CurcuWIN™ significantly more bioavailable than other commercial formulations

Jäger R et al. Comparative absorption of curcumin formulations. *Nutr J* 2014 Jan 24;13(1):11.

SUPPLEMENT FACTS

Available Bottle Size: 90 or 180 Count

Serving Size: 2 Capsules

Servings Per Container: 45, or 90

Holy Basil (<i>Ocimum tenuiflorum</i>) 2% ursolic acid	250 mg
CurcuWIN™ Turmeric Extract <i>Curcuma longa</i> Rhizome ext. (20% Curcuminoids)	250 mg
Ginger (5% gingerols)	100 mg
Green Tea Extract (95% Polyphenols, 45% EGCG, <6% Caffeine) (<i>Camellia sinensis</i>)	100 mg
Boswellia Serrata 65% ext	100 mg
Bromelain (2400 GDU/g)	100 mg
Baical Skullcap (<i>Scutellaria baicalensis</i>) 30%	50 mg
Black Pepper Fruit Extract (Bioperine®) Yielding 95% Piperine	10 mg
Resveratrol 50% (<i>Polygonum Cuspidatum</i>)	10 mg
Berberine HCl 97%	5 mg

Other Ingredients: vegetable stearate, rice flour, hypromellose, water.

Suggested Use: As a dietary supplement, take 2 capsules daily with food, or as directed by your healthcare practitioner.

Warning: If pregnant or nursing, consult your healthcare practitioner before taking this product.
