NeuroMax

Available in 60 Serving Liquid

NeuroMax is a phenol-free dietary supplement designed to support balanced behavior, social interactions, immune system function, and stress management.

Recommended For:

- · Balancing behavior and socialization skills
- Helping to cope with stress
- Improving mental clarity
- Supporting immune system function

About the Ingredients

Vitamin B1 (as Thiamine HCI) helps the cells in the body convert food into energy. If you do not have enough vitamin B1 this process cannot work properly. You may have symptoms that affect the nervous system, the heart, and the brain. Taking NeuroMax helps to restore normal levels of vitamin B1 in your body.

Vitamin B5 (as pantothenic acid) is necessary to synthesize coenzyme A (CoA). It's essential for fatty acid metabolism – as well as synthesizing and metabolizing proteins, carbohydrates, and fats.

Vitamin B6 (as pyridoxine HCl and Pyridoxal 5-Phosphate) supplementation results in improved behavior, better eye contact, less involuntary physical action, and more interest in participation.

Quatrefolic® (Folate) helps in the metabolism of the amino acids used by the brain and may improve symptoms associated with attention deficit.

Vitamin B12 (as Methylcobalamin) enhances sleep patterns and improves production of the neurotransmitter acetylcholine, which assists in memory and learning.

Vitamin D3 (as Cholecalciferol) is a fat-soluble vitamin that is essential for maintaining normal calcium metabolism. Vitamin D3 (cholecalciferol) can be synthesized by humans in the skin upon exposure to ultraviolet-B (UVB) radiation from sunlight, or it can be obtained from the diet.

Magnesium (as Magnesium citrate) is a mineral that improves cognitive function and is essential for normal brain and nervous system functions.

Calcium (as Calcium citrate) plays a very important role in the body. It is necessary for normal functioning of nerves, cells, muscle, and bone. If there is not enough calcium in the blood, then the body will take calcium from bones, thereby weakening bones. Having the right amount of calcium is important for building and keeping strong bones.

Zinc (as Zinc amino acid chelate) promotes a healthy immune system, and helps fight the formation of free radicals.

Dimethylglycine HCI (DMG) has been reported to modify and improve behavior, eye contact, social interaction, verbal skills, mental alertness and brain function, and may reduce lethargy.

It is a precursor to many amino acids and neurotransmitters that aid in brain and nerve function.

Betaine Anhydrous helps improve behavior, increase social interaction, improve circulation, normalize amino acid metabolism, and protect the liver from fat deposits. Betaine is a precursor to DMG.

SUPPLEMENT FACTS

Serving Size: 7.5 ml (approximately 1 tsp.)

Servings Per Container: 60

Amount Per Serving

Vitamin B1 (as Thiamine HCl) 10 mg
Vitamin B5 (as Pantothenic Acid) 10 mg
Vitamin B6 30 mg
(as pyridoxine HCl and Pyridoxal 5-Phosphate)

Folate [from Quatrefolic®, 667 mcg DFE

(6S)-5-Methyltetrahydrofolic acid,

glucosamine salt]

Vitamin B12 (as Methylcobalamin) 25 mcg

Vitamin D3 (as Cholecalciferol) 10 mcg (400 IU)

Magnesium (as Magnesium citrate)

Calcium (as Calcium citrate)

Zinc (as Zinc amino acid chelate)

Dimethylglycine HCl (DMG)

Betaine Anhydrous

50 mg

50 mg

250 mg

Other Ingredients: Purified water, glycerin, xanthan gum, natural flavors, malic acid, stevia leaf extract, and potassium sorbate.

Suggested Use: Shake well before each use. As a dietary supplement take:

4-11 years old: 1/2 tsp. twice daily.

Over 12 years old: 1 tsp., 3 to 4 times daily or as directed by your healthcare practitioner. Product can also be mixed with a small amount of water or juice if desired.

Warning: If pregnant or nursing, consult your healthcare practitioner before taking this product.
