Virility

Available in 90 Count Vegetarian Capsules

Dr. V's Virility supplement provides advanced reproductive health support for men. This formulation contains several agents to support sexual function and testicular health as well as enhance detoxification, and reduce free radical damage.* This comprehensive product contains L-arginine, maca root, tribulus terrestris extract, horny goat weed, DIM (diindolymethane), ginkgo biloba extract, panax ginseng root, and bovine testes extract from Argentina.

L-Arginine is a semi-essential amino acid that is a precursor to nitric oxide which regulates blood vessel dilation. Arginine is also a potent antioxidant. It is used clinically in conditions that are improved by vasodilation like heart failure, kidney failure, erectile dysfunction, and intermittent claudication.* Trials in animals and humans show arginine may play a role in improving erectile dysfunction, sperm count, and sperm quality.

Maca (Lepidium meyenii) root is a plant from the cruciferous family cultivated at high altitude in the Peruvian Andes. Studies have examined its many potential health applications, including research on maca's benefits to male reproductive health: increased seminal volume, sperm count per ejaculation, and sperm motility. Furthermore, clinical trials have shown that maca may improve mood, energy, anxiety, and libido.

Tribulus terrestris has long been used by herbalists as an intervention to support male fertility and sexual function. This plant has been naturalized worldwide throughout South Africa, Australia, Europe, and India. A systematic review of scientific literature demonstrated that there is evidence-based support for using Tribulus to improve male sperm parameters. Tribulus has also been shown in studies to lower blood sugar.

Panax ginseng root has many benefits for human health and has been utilized by herbal practitioners for over 5000 years. Ginseng is an invigorating adaptogenic tonic used to improve vitality, physical performance, and overall quality of life. Research studies have shown that ginseng significantly improves erectile function, sexual desire, orgasm, and sexual satisfaction.

Horny goat weed (Epimedium sagittatum) is an herb with antioxidant properties that has been widely used in traditional Chinese medicine to support sexual function. Studies in animals support its potential use in improving erectile dysfunction and protecting male sexual organs against damage from toxic exposures. Epimedium has also been researched for its protective ability in reducing age-related degeneration of testicular function.

DIM (diindolymethane) is derived from cruciferous vegetables like cabbage, broccoli, and Brussels sprouts. DIM demonstrates anti-cancer activity and is involved in the metabolism and elimination of biologically active compounds like hormones. DIM plays a role in estrogen and testosterone metabolism and may contribute to a beneficial shift in the balance of estrogen, testosterone, and progesterone. Estrogen is produced in both women and men, and inadequate estrogen metabolism is associated with hormonal imbalance in both sexes. Furthermore, DIM may mitigate damage to the liver by toxins and carcinogens by inhibiting pro-inflammatory mediators and free radicals.

Ginkgo biloba is native to China and is thought to be the oldest living tree. Ginkgo has been utilized by herbalists worldwide for thousands of years to support circulation and for other medicinal purposes. Optimal circulation is important for sexual function and reproduction. Ginkgo has been shown in animal research to enhance testosterone synthesis in the setting of diabetes, reverse testicular damage and restore function, and protect against oxidative damage in the testes due to toxic exposures.

Warning: Do not take this product if you have low blood pressure, diabetes, prostate cancer, benign prostatic hypertrophy (BPH), or taking medications, without first consulting your healthcare provider. If pregnant, nursing, or planning to become pregnant, do not take this product.

Serving Size: 3 Capsules | Servings Per Container: 30

L-Arginine	500 mg
MACA (Lepidium Meyenii)(Root)(4:1)	250 mg
Tribulus Terrestris Extract 90%	250 mg
Panax Ginseng Extract (Root) 15%	200 mg
Horny Goat Weed (Epimedium SAgittatum)(Herb)	125 mg
Diindolymethana (DIM)	100 mg
Testes (Bovine, AR, freeze Dried)	100 mg
Ginkgo Biloba Extract 24% (Ginkgo biloba L.)(Leaf)	60 mg

Ingredients: Organic Brown Rice Flour, Magnesium Stearate (Vegetable), Vegetarian Capsule (Hypromellose & Water)

Suggested Use: As a dietary supplement, take 3 capsules daily, or as directed by your healthcare practitioner.

Warning: If pregnant or nursing, consult your healthcare practitioner before taking this product.
